

NEC offers Education and School Management Solutions

Ensure a more focused learning environment for your students

NEC offers versatile technology for Education and School Management that enhances efficiency and productivity of the school management space.

Incorporating technology into curriculum at any level can greatly increase the effectiveness of teaching.

NEC's award-winning projectors are ideal for educational environments—from classrooms to hallways and auditoriums.

The world is quickly learning the benefits of adding multimedia capabilities to educational environments. Improved student attention, better presentation quality, enhanced understanding of information, and cost and time saving are just a few benefits of making projectors an inseparable part of the teaching environment.

Most schools at present have less than four projectors whereas teachers believe that the ideal minimum number of projectors should be 16 in a school of 30 classrooms. NEC offers an entire range of display products from portable to professional LAN projectors and has one of the largest ranges of LCD and DLP projectors in the industry today.

NEC projectors can be placed on a media cart for easy sharing with other teachers and classrooms.

Intelligent Projection System

NEC's award-winning projectors are ideal for educational environments—from classrooms to hallways and auditoriums. These include the largest ranges of LCD and DLP projectors in the industry today.

The different models of NEC Projectors

- Portable Series
- Professional Series
- Professional LAN Projectors

NEC's **WT610 Super Short Throw Projector** is ideal for small classrooms. It allows the presenter to stand in front of the screen without blocking the light from the projector; so, there are no shadows on the screen. The WT610 can project a 60" image from less than 11" throw distance and comes with an optional wireless LAN card.

These series are supported with

- Higher Brightness & contrast ratio
- Wires/Wireless Networking
- Automatic Key stone Correction
- Reliability
- Auto Set up, Auto Focus, Auto Input Selection
- Optical & Digital Zoom lens
- Security & User Identification System
- Longer Lamp life

NEC Servers

The NEC rack and tower servers are best for database and common applications like ERPs, digital library, emails and web browsing. NEC server product line ranges from two-way systems to advanced four and eight way rack. NEC also offers tower enterprise servers designed to meet the requirements of education institutes for high performance & manageability.

The NEC server models are designed to suit every need. The different models available include:

- NEC School Servers
- NEC Campus Servers
- NEC Large Campus Servers

Thin Client System

Thin Client Virtual PC Solutions has re-defined the traditional teaching method to an interactive learning program. NEC is leader in Virtual Desktop Computing. NEC VPCC is not just a server but a complete solution. NEC Servers are optimized, tested and certified for virtualization environment.

NEC next generation Desktop Virtualization "Virtual PC Center" (VPCC) Thin-Client system saves up to 62% System power consumption compared with normal PC. VPCC setup uses server-based computing where the data is secure and protected on the server side and not exposed to misuse, theft, hacking and is insulated from virus and worms.
